

Roundhouse Accelerator Programme 2021

Application questions

To apply for the Roundhouse Accelerator 2021 programme, you will need to complete the application on Video Ask [here](#).

We have also put the questions below so that you can see them before you start your application. There are 22 questions and it should take you approx 30 mins to complete, if you've prepped your answers beforehand. Video ask is a super reliable platform, but we do recommend preparing your answers in advance and saving them to avoid any technical issues, just in case.

These are the questions you will be asked:

- What is your creative business?
- Why did you start your business?
- How long have you been pursuing your business and what has the journey been so far?
- What benefit would joining this accelerator have on you and your company?
- How does your business contribute to the community or wider society?
- What are your aims for the next 12 months?
- What creative sector/s is your business (you can select more than one)
- Please provide us with some links to read more about your business/practice (this could include your social feeds, website or presentations)
- Please provide any feedback, stats or engagement from your business so far? e.g. feedback from event attendees, testimonials from customers, stats on income generation etc
- How many people are involved in your company, and to what extent? (what does each member of the team do)
- How many days a week does each team member currently work on your business? (it's OK if it's just you)
- How many people from your company would want to participate in the programme?
